

Low cost, quick start, easy to use.

pirana is a uniquely affordable suite of browser-based maintenance management software products.

Designed by industry experts, Shire Pirana enables you to access your system and view management information via your own personalized dashboard from anywhere in the world.

By using Shire Pirana you will be able to save considerable time and admin costs by confidently scheduling work orders for breakdowns and PM Maintenance, whilst maintaining comprehensive task & asset registers.

Regulatory compliance, avoiding disruption, boosting equipment availability, cost reduction, ensuring people safety, keeping up with ever-changing customer demands — no matter what your concern, we have a solution to put you in control.

One size fits all

Pirana is ideal for both small and large organisations.

Those with a mobile workforce will find the advantages simply amazing.

Affordable Unbeatable value

Easy to Use Get real results without an excessive learning curve. The intuitive interface ensures that features are very easy to locate.

Accessible Internet & mobile phone deployment means you can access your system just about anywhere.

Scalable Pirana is designed for use by one, to any number of users.

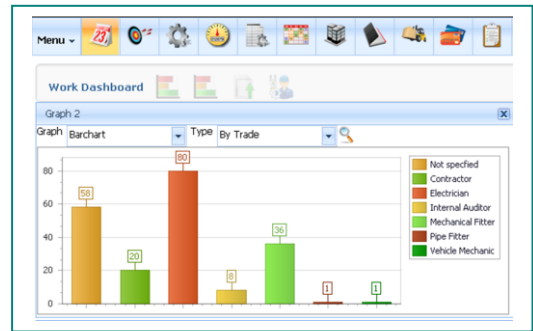

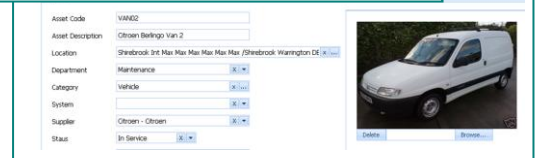

Hosted Option Talk to us in the morning and you could be using your system later the same day!

Secure The entire system has full location security and user access protection.

Flexible Configure the system to reflect your own terminology or language.

Improved Decision Making Pirana presents a powerful reporting capability in addition to advanced filter and search.
